

Declaration for Frequency Operation

Dear Sir/ Madam,

We would like to declare that the product model, FortiAP-221C (FAP-221C-I), transmits frequencies are restricted to the frequencies below:

Frequencies used:

5180MHz-5240MHz (upper 5GHz bands are disabled)
2412MHz-2472MHz

The FortiAP-221C indoor access points are only equipped with internal antennas.

The product datasheet is generic hardware capability and does not reflect the actual operation of the device per countries.

The distributor and end-user do not have access to change these settings.

Sincerely Yours,

Andrew Ji
Director of Operations
Fortinet, Inc.
